HCS
Hybrid Cycling System

Hatsan's patented Hybrid Cycling System combines the best features from each of the two traditional cycling operating systems. Recoil is low, while cycle rate and effective range are high. It will cycle light loads like a traditional gas system, but uses much less gas to do so – which means you don't have to clean as frequently. Disassembly/assembly is much simpler, as well, making maintenance even easier than ever.

Hybrid Cycling System (HCS) brings together the perfect combination of speed, range, and comfort.

Muzzle cap included.

Flash Suppressor included.

Escort Fast Loading System

Escort Fast Loading System enables faster and easier loading into the magazine with one hand in the reliable double bar system. Escort's patented Fast Loading System provides faster loading of shot shells into the magazine without changing the aiming position. It also unlocks bolt which is locked at the rear. Both the carrier and fast loading button are hard chrome plated for longer life and maximum corrosion resistance. Fast Loading System is standard on all Escort semi auto shotguns.

Elevation adjustable cheek piece.

Hatsan design telescopic stock. Stock can be shortened by 10cm (4").

Magazine Cut-Off

By pressing this button, you can retain shells in the magazine and can eject a shell from the chamber without feeding another one from the magazine.

Picatinny rail and ghost ring fiber optic rear sight.

Adjustable fiber optic front sight and flash suppressor.

Muzzle cap included.

Flash suppressor included.

Door buster is optional

Stock can be removed easily for use with pistol grip only.
